CAREER OBJECTIVE

Motivated Information Technology undergraduate with hands-on experience in Artificial Intelligence, Retrieval-Augmented Generation (RAG), and Large Language Models (LLMs). Passionate about designing intelligent, scalable systems that solve real-world problems through advanced prompt engineering and semantic search. Seeking an AI Engineer or Software Engineer internship to contribute innovative solutions and grow within a collaborative engineering team.

EDUCATION

Shri Vishnu Engineering College for Women — B.Tech, Information Technology

2024 - 2028 | CGPA: 9.56 / 10.00

Sri Vasavi Mahila Junior Kalasala — Intermediate (MPC) | 98.5%

Zilla Parishad Public High School — SSC | 88.5%

TECHNICAL SKILLS

Languages: C, Java, Python

AI / LLM: RAG, LangChain, Prompt Engineering, Tool Calling, Semantic Search, Vector Databases, FAISS, Embeddings, LLMs

Machine Learning: Scikit-learn, Classification

Web & Backend: Flask, HTML, CSS, JavaScript

Databases: MySQL

Tools: Git, GitHub, VS Code, Postman

Core CS: Data Structures & Algorithms, DBMS, Operating Systems, OOP, Problem Solving

PROJECTS

Placement Intelligence AI Assistant (github.com/Iswarya952/placement-intelligence-rag)

Python, LangChain, FAISS, Flask, MySQL, Prompt Engineering

- Engineered an AI-powered placement assistant using RAG, enabling semantic search across 500+ placement documents with sub-second retrieval latency.
- Integrated dynamic MySQL querying and real-time web search for contextually accurate, multi-source responses.
- Designed modular vector embedding pipelines with FAISS, improving retrieval precision.
- Built a Flask-based conversational interface supporting iterative follow-up queries.

Advanced RAG Chatbot (github.com/Iswarya952/advanced-rag-chatbot)

Python, LangChain, FAISS, Flask

- Developed a document question-answering chatbot with advanced RAG pipelines achieving high-accuracy semantic retrieval using FAISS vector indexing.
- Implemented multi-tool orchestration (web search + SQL querying) via LangChain tool-calling.
- Enhanced response relevance through iterative prompt engineering, reducing hallucination.
- Delivered a production-ready interactive Flask interface with real-time streaming response support.

UPI Fraud Detection System

Python, Scikit-learn, Flask, Machine Learning

- Built and trained a classification model to detect fraudulent UPI transactions with optimized precision-recall.
- Performed end-to-end feature engineering and preprocessing, evaluated via F1-score and ROC-AUC.
- Deployed a real-time fraud prediction Flask web application for instant risk assessment.

Smart Attendance Management System

Python, OpenCV, Flask

- Developed an automated face-recognition attendance system using OpenCV, eliminating manual roll-call.
- Achieved high attendance accuracy with persistent backend database storage for audit-ready records.

ACHIEVEMENTS

- Ranked in the Top 1500 globally in the BigCode Challenge 2026.
- Contributed 6 merged pull requests to open-source repositories during Hacktoberfest 2025.
- Solved 200+ coding problems across LeetCode and other competitive programming platforms.
- Earned the LeetCode 200+ Days Coding Challenge Badge, demonstrating consistent daily practice.

LEADERSHIP

Hackathon Team Lead — Adobe Hackathon, HP Hackathon, Smart India Hackathon

Directed cross-functional teams through end-to-end hackathon cycles: ideation, sprint planning, task delegation, and final delivery under strict time constraints.

ADDITIONAL INFORMATION

Soft Skills: Communication, Leadership, Teamwork, Time Management, Critical Thinking

Languages: English (Proficient), Telugu (Native)
